How? To achieve what?

How can they possibly orchestrate a unique & complex ecosystem?

Data has a better idea

- Dynamic pricing
- Dynamic local energy presumption strategy
- Energy sharing
- Aggregation execution
- GRID insight
- GRID optimization
- ROI growth
- Improved grid utilization
- Asset virtualization
- Voltage management
- CAPEX optimization
- Directed local energy management
- DSO-TSO flexibility
- GRID balancing
- GRID planning
- Beyond meter optimization
- Virtual power plant management
- Imbalance position optimization
- Ancillary services
- Certification of origin

Local specifics

How quickly are we actually innovating? Can we do more?

Innovation potential

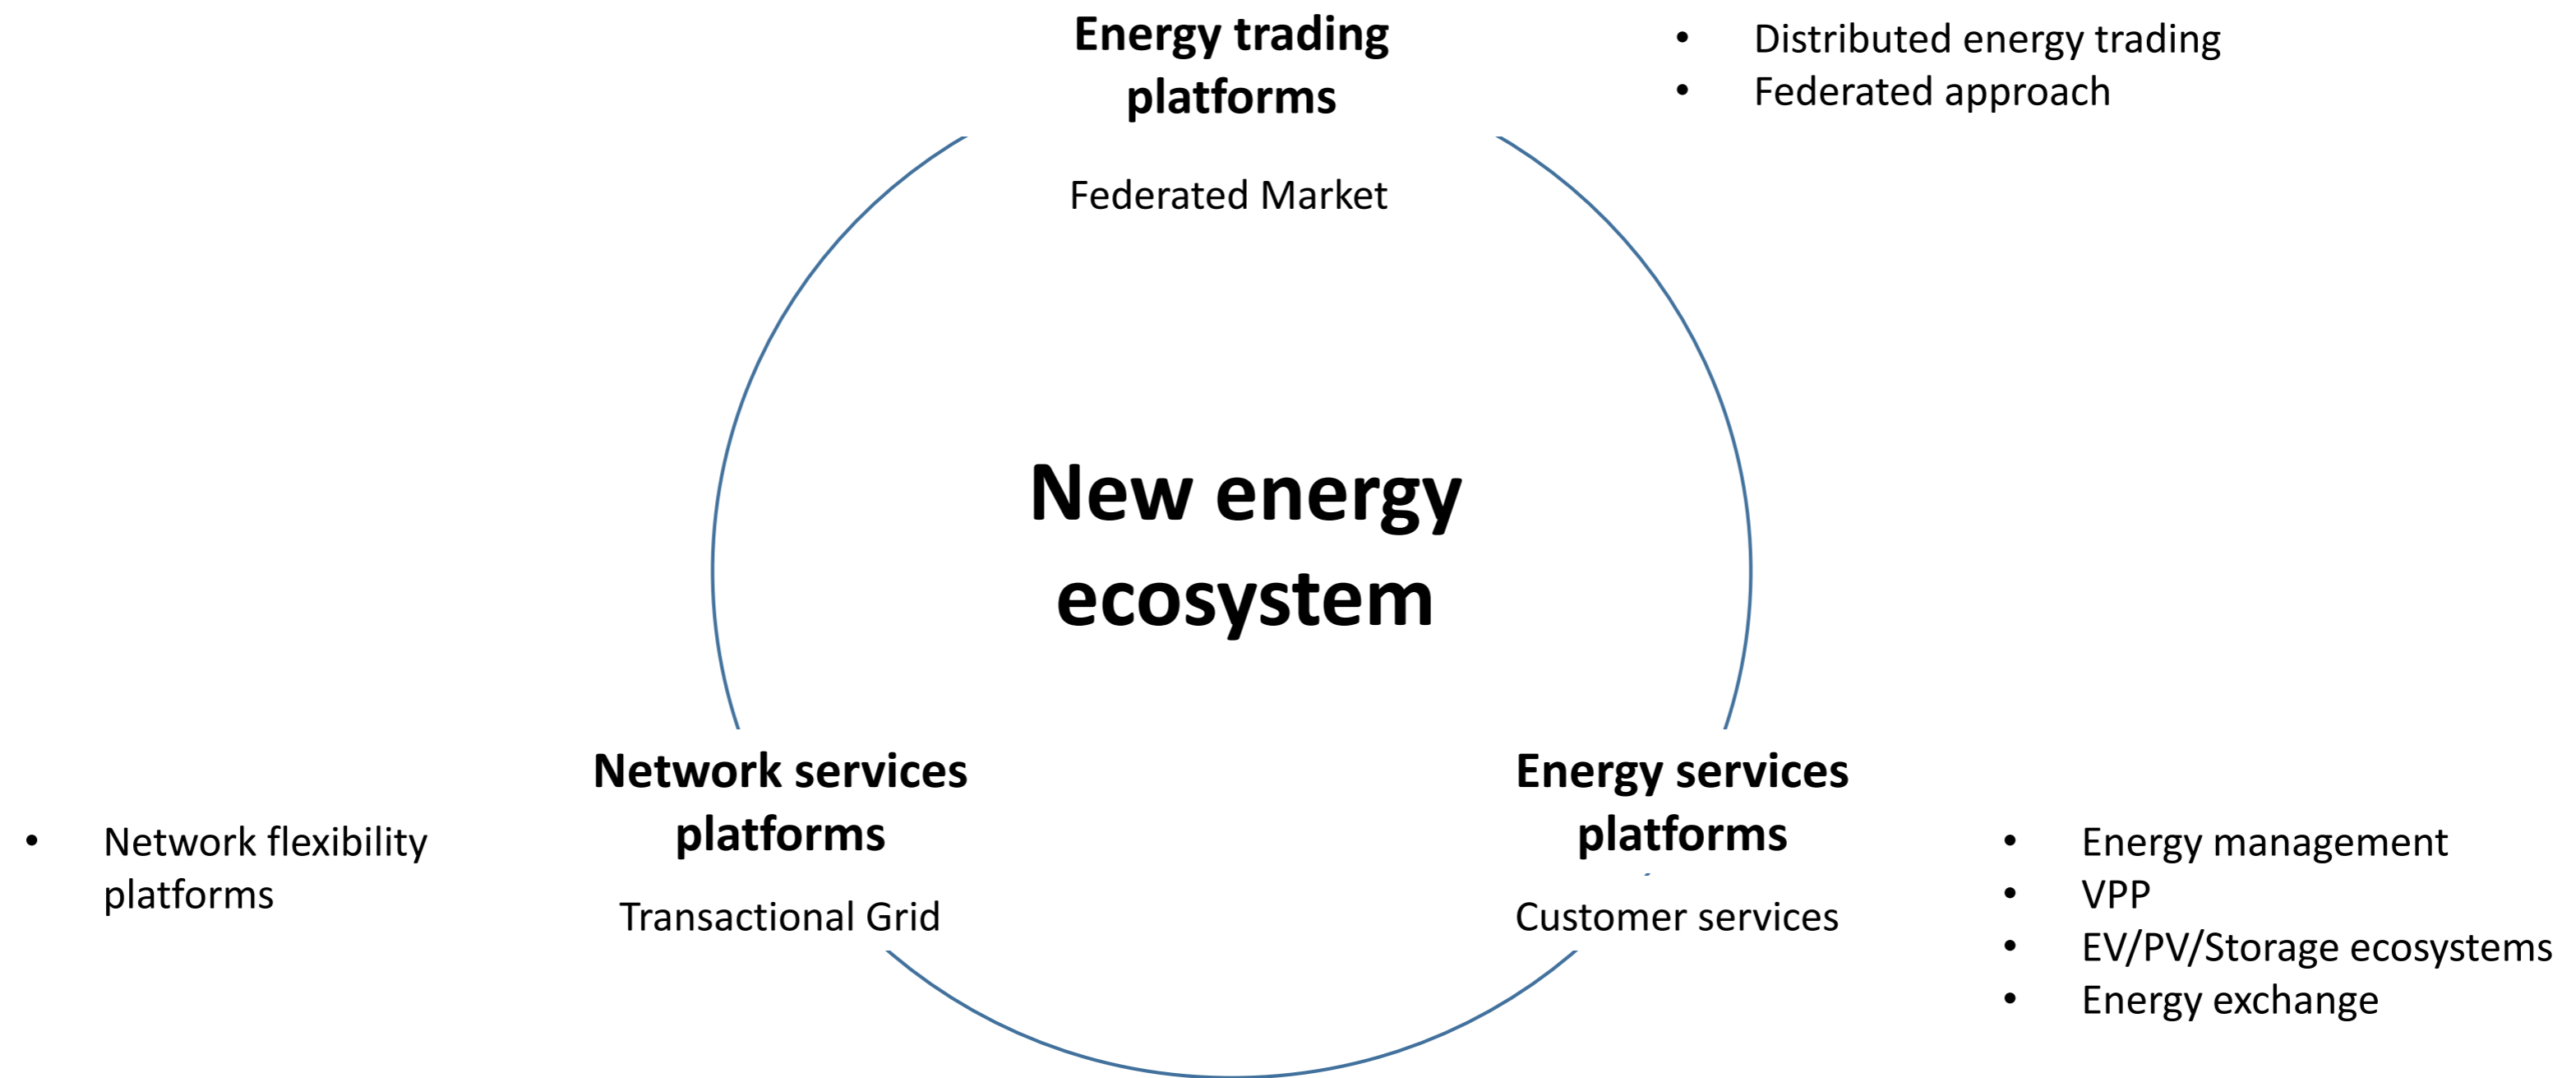

Innovation appetite

Slovak Energy Innovation Ecosystem...

What is next?

Where are we heading in terms of new energy market? Platforms.
